How does the Loyalty Program work?

Loyalty Rewards · https://windsorbrokers.com/knowledge-base/loyalty-rewards/how-does-the-loyalty-program-work/

The Windsor Brokers Loyalty Program rewards your trading activity by granting loyalty points for predefined actions, such as trading or activating passive interest rewards on your capital. Participation is automatic for all eligible clients with a verified live trading account.

At the end of each calendar month, your Loyalty Status is determined by the total number of closed lots accumulated to date. The more lots you close, the higher your status and the more points you earn per lot. In short: the more you trade, the more rewards you can collect.

There are four Loyalty Status levels:

- Silver
- Gold
- Platinum
- Diamond

Earned points can be redeemed for US dollars and credited directly to your trading account balance. The program runs continuously, and you may opt out or cancel your points at any time by contacting Customer Support.
